

Moroccan Hammam

Installation details

- Location: Hammam (public bathhouse)
Sefrou, Morocco
- Model:  Vulcan 3000
- Treatment Area: Hot water tank
- Problem: Scale was too hard, needed to do manual cleaning with 5 persons and close the bathhouse
- Result: After 1 month, the scale became really soft
- Installed by: STE ETCT INDUSTRIE

Testing the Vulcan function with the impulse detector.

Before Vulcan was installed, the hot water tank was full of hard scale, very difficult to remove.

With Vulcan 3000 for 1 month, the scale became soft and easy to remove.
